

## Lean Services (Reduce Waste & Cycle Time)

Doing Right: 4-P Model

### Are You Struggling With Waste?

Business processes in many cases require too much time as a result of any combination of 8 mudas (waste) - excess creation, excess inventory, defects, over processing, waiting, underutilized people, excess motion in a process, excess transportation between processes. Businesses struggle to meet customer delivery expectations due to waste in their processes and a lack of knowledge of how to make it better.

### We Can Help You!

Service	Description	Outcome
<b>Lean Assessment (1 to 3 days)</b>	To assess the current operations to determine its performance and recommend corrective and preventive actions	Recommendations to reduce cost and improved on-time delivery

### Leveraging the Power of Lean

Many business are struggling to meet customer's higher service or delivery expectations. Inherent bottlenecks, quality issues, under utilized facilities, excessive equipment downtime and inefficient logistics drive up operational costs. The Accelper team has assisted many companies in reducing waste, and improving dramatically cycle time and service levels to their customers.
