

## Practical Six Sigma (Focusing on Improvement) Succes\$ in < 90 days

### Are You Struggling With Waste?

Internal costs in many cases are too high as a result of poor quality including returns, rework, cancellations and complaints. Businesses struggle to improve quality due to a lack of qualified and knowledgeable resources, and finding the time to focus on improvements. Poor performance in product or service quality directly impacts the business's ability to retain customers and poor word of mouth makes it difficult to acquire new customers.

### We Can Help You!

Service	Description	Outcome
<b>Waste Reduction Assessment (1 to 3 days)</b>	To assess the current operations to determine its performance and recommend corrective and preventive actions.	A detailed report of recommended actions to reduce waste that will result in reduced costs and better performance to your customers.

### Do You Want to Leverage the REAL Power of Six Sigma?

Many business are struggling to meet customer's higher service or delivery expectations as compared to the top competitor. Inherent bottlenecks and delays reduce performance to customer requirements and drive up operational costs. Facilities, equipment, and logistics downtime causes increased operational costs. The Accelper team has assisted many companies in deploying Six Sigma by successfully reducing waste including errors, bottlenecks, failures and downtime. This has resulted in improving service and delivery to their customers.

Our approach to deploying Six Sigma prevents false starts, and guarantees success and savings. Our accelerated approach to deploy Six Sigma will deliver benefits of Six Sigma in less than 90 days.
