6. Praveen Gupta is the **most inspiring** speaker and mentor that I have encountered in my life's journey. He is right-on in the drive for excellence in all that we do in our contributions in this life: whether in our work, local communities, any level of our nation's governmental systems. Identify the most important issue, find what mostly contributes to the problem, build a team to plan a solution that adds value to the process or product, and then sustain the growth that you have then realized. I am most appreciative in having experienced this knowledge-sharing session with Praveen, his support staff in this event, and all the great talent I met in the nearly 150 attendees that are very committed in their passion to make a difference in what we do and how we work. - [John Moody](#)
7. Praveen is one of the **best teachers** / instructors among all training classes or educational courses that I have been through so far. He made the six sigma course so much easy to learn for anyone who has little desire to learn without even knowing a lot about statistics. One thing that impressed me a lot is that “failure is not an end of world”. He has very good sense of humor, keeping students interested throughout the course. Excellent job! Keep it up! – Dinesh Patel

13. He is an **excellent, talented and a well versed** instructor who understands his students / audience well, and knows his subject very well. His program had the right combination of ingredients. He knew how to keep all of the students engaged. Six Sigma is an intense class which was taught in a very simplified manner and he made sure that even the novices understood the intent of Six Sigma well. He brought in a very special guest, Mrs. Smith (Bill Smith's) wife's to speak on her legendary husband's invention of the Six Sigma, which was just great and a wonderful treat for all. The challenging project assigned in the class really helped understand the Six Sigma tools well. I have learnt to use the Pareto tool even in my daily life and from now onwards will not use the term "Acceptable" anymore. It will be "Excellence" which he, without any doubt delivered to all of us. – T. P.
